

ESTABLISHED 1904

# KUNDE

FAMILY WINERY

The Kunde Estate was formed by mother nature over 5 million years ago from volcanic eruptions in what is now the Sonoma Valley. It has created the perfect environment of iron rich soils that are ideal for growing the highest quality of varietal wine grapes.

## KUNDE ESTATE

Recognized as one of the first certified sustainable winery and vineyard operations in the state of California.

From the valley floor to 1,700 feet up into the Mayacamas mountain range, the Kunde Estate is a magnificent patchwork of red and white varietal vineyard blocks. The vineyards weave themselves into the picturesque topography, with each block planted specific to slope, terroir and sun exposure. With 700 acres currently planted under vine, the remainder of the 1,850 acre Kunde Estate is left in its natural splendor, a sustainable ecosystem of oak woodlands, native grasslands, chaparral and riparian habitats.
