

All Kunde Family Estate white wines are in screw caps.

Screw caps are convenient, maintain freshness and eliminate cork taint.

Freshness.

Screw caps offer a freshness guarantee. They do a superb job preserving the wines' aromas and flavors, not permitting oxygen to pass through.

Convenience.

No corkscrew needed! Easy-to-open. Easy-to-store. Perfect for on-premise.

Consistent.

Screw caps enable wines to retain their excellence after bottling, an assurance of quality for bottle and BTG offerings.

Winemaker Passion.

Screw cap closures ensure that the wine you taste is as the winemaker envisioned it.

"More and more excellent wines are being sealed with screw caps to prevent corkiness [wet cardboard-like smell]. Screw-capped wines are especially handy for larger parties, because they're easy to open quickly."

Source: **FOOD & WINE** Ray Isle, November 2008

"A screw cap was once proof positive that a bottle's contents were low-end. No longer: The metal closures now seal wines sold at all price points from diverse producers. While consumers expressed resistance at first, they now seem to be accepting that good—even great—wines can come under metal closures."
